PYTHON BACKEND DEVELOPER | APPLICATION DEVELOPER

✚ Results-driven software professional with 3+ years of experience in designing, optimizing, and maintaining efficient, scalable backend systems in real-world production environments. Proficient in **Python, Numpy/Pandas, Django, SQL, PL/SQL, UNIX**, and **Data Structures & Algorithms**, with proven expertise in writing clean, maintainable code. Now focused on leveraging strong coding skills and backend experience to excel as a **Software Development Engineer / Python Developer**.

✚ **Areas of Expertise:** - Database Management | Backend Enhancements | Data Structures & Algorithms | Coding & Testing Standards | Object Oriented Programming | Python Scripting | Data Analysis | Statistics | Debugging & Troubleshooting Issues | Cross-Functional Collaboration | Analytical Skill | Problem-Solving | Written and Verbal Communication Skills | Attention to details | Organization Skills | Team Player

✚ **Technical Skills:** -

Programming Languages: Python, SQL, PL/SQL

Operating Systems / Scripting: UNIX

Data Science: NumPy, Pandas, Matplotlib, Seaborn, Jupyter Notebook

AI / GenAI: Generative AI concepts, Prompt Engineering, LLM tools

Python Frameworks: Django, Flask

Exposure to : AWS, Docker, GCP, GIT, Redis, REST API, FAST API

Other Technical: Data Structures and Algorithms and OOPS

SELF PROJECTS

Full-Stack Django Portfolio & Cloud Architecture : <https://dhairya-portfolio.onrender.com/>

Technologies: Python, Django, PostgreSQL, Cloudinary API, CI/CD (Render), HTML/CSS

- Designed and developed a production-ready personal portfolio to dynamically manage and showcase projects, skills, and professional experience via a customized Django Admin dashboard.
- Upgraded the data layer from local SQLite to a serverless PostgreSQL database (Neon) to ensure strict ACID compliance and scalable data modeling.
- Bypassed ephemeral cloud storage limitations by integrating the Cloudinary API for persistent media routing, and configured WhiteNoise for optimized static asset delivery.
- Established an automated CI/CD pipeline linked to GitHub for seamless, zero-downtime deployments to a live Render production environment.

CAREER SUMMARY

- 3 years of experience in backend development for enterprise systems like Kroger RMS, with expertise in Python, Django, SQL, PL/SQL, UNIX, and data-processing libraries such as Pandas and NumPy.
- Strong foundation in Python, OOP, Data Structures & Algorithms, and data analysis, enabling efficient problem-solving, scalable application development, and data-driven solutions.
- Experienced in designing, optimizing, and automating backend workflows to improve system performance, data accuracy, and operational efficiency while collaborating effectively with cross-functional teams.
- Knowledge of Generative AI and prompt engineering, leveraging AI-assisted development tools to enhance Python development productivity, automate tasks, and accelerate problem solving.
- Currently pursuing opportunities as a Software Development Engineer / Python Developer / Data Analyst to leverage backend expertise, Python automation, and analytical skills to build scalable and impactful solutions.

ACHIEVEMENTS

- Optimized SQL queries and backend routines using Python-based data analysis (Pandas/NumPy) to identify performance gaps, significantly improving bulk data processing speed and reducing system downtime.
- Automated manual checks, data validation, and reporting by developing Python scripts with OOPS principles and PL/SQL logic, cutting repetitive workload and improving deployment efficiency.
- Built internal monitoring utilities using Django and Python Selenium for workflow validation, enabling faster detection of issues and ensuring 99% on-time application availability for clients.

- Served as a core member of IBM's Buzz Team, leading the planning and execution of quarterly employee engagement events such as offsite trips, cultural celebrations, workshops, and themed activities, fostering a vibrant, inclusive, and high-energy workplace culture.
- Contributed to IBM's CSR efforts by participating in the creation of solar lamps, educational kits, wheelchairs, festive hampers, and Diwali cards, positively impacting the lives of underprivileged and orphaned children through purposeful volunteer initiatives.

WORK EXPERIENCE

IBM, Mumbai

July 2022 – Sep 2025

Application Developer:

Project: Kroger

- Managed incident resolution, data integrity issues, and system health monitoring using Python scripts and SQL validations, ensuring uninterrupted RMS application availability.
- Provided production job support by recovering failed batches caused by data or script errors through log analysis using UNIX commands, Python utilities, and SQL diagnostics.
- Developed complex SQL queries and performed table updates to resolve data issues, while using Pandas and NumPy in Python to analyze and validate large datasets before applying fixes.
- Automated manual checks and data-validation workflows by developing Python scripts using OOP principles, improving efficiency and accuracy in bulk data operations.
- Built automated UI and workflow validation tools using Python Selenium, reducing manual testing effort and identifying UI issues earlier in the release cycle.
- Collaborated with cross-functional teams to develop internal dashboards using Django and streamline backend processes through Python automation and UNIX-based monitoring.

EDUCATION

- 2017-2021 | B.Tech. Electronics | K. J. Somaiya College of Engineering CGPA : 7.58/10

CERTIFICATIONS

- PCEP, Certified Entry-Level Python Programmer, Python Institute, 2025
- Oracle SQL Certified Associate, Oracle, 2024
